Pomodo Modules and Features

Desktop POS

POS/Front Counter Operations

Process retail sales with Pomodo's desktop POS. Easily ring up customers and manage day to day sales activity. Our cloud sync allows you to share inventory and sales information back and forth between the POS and the Pomodo Cloud, so you can access and update what you need any time, anywhere.

Order Fulfillment

Cloud Order Fulfillment

Efficiently manage all your orders in one convenient location on the cloud. Perfect solution for sales reps in the field, B2B orders, and phone orders. Create quotes, orders, shipments and returns in one convenient location on the cloud. Our advanced order features include, Orders to POs, P&L, Overhead, and Custom Fields.

Customers

Customer Management

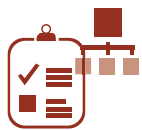

Maintain customer information to use as a valuable marketing tool. Our Customer Manager allows you to track all customer information including order history. You can create custom fields to keep track of any information and sort and filter by those custom fields.

Purchase Orders

Purchasing & Procurement

Use our Purchase Order Module to create orders to your vendors. Ensure that your orders are accurate and timely, while maintaining a history with your vendors. Pomodo gives you the ability to create your own purchase order process by giving you the ability to set up and assign stages to each order so you know exactly where your orders are in the procurement process.

Inventory

Inventory Management

Count, track, and manage everything you need to know about your inventory. Know what you have and what you need so that you can accurately plan ahead. Set up unlimited custom fields to track any important information about your products and set up email notifications for low inventory so you never run out of key products.

Our advanced inventory module gives you access to kits and assemblies to package up your products. You will also be able to set up package types so that you can manage pallets, cases, cartons, individual items and sell and receive based on your unique business.

Need an efficient, simple way to get inventory in and out? Pomodo transfers are a perfect solution! Move inventory in and out with just a few clicks, while maintaining a history of your product movement.

Shipping Bump Bar

Pick, Pack, Ship

Using the Pomodo Shipping Bump Bar, collect your orders from all channels and manage your pick, pack, and ship process. Quickly get your products to your valued customers by creating an efficient process. You can even automatically tender and email out invoice and receipts on a preset schedule.

Accounting

Accounting Integration

With a variety of reporting and export tools, we can make it easy to get important information from Pomodo to your accounting program. Have an accountant working offsite? Give them an accounting role in the software, and they can access what they need from anywhere.
