

BeerModo Database

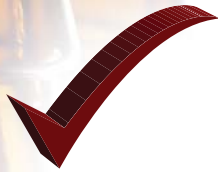

Our beer distributor database is a great starting point to setting up your inventory with Pomodo!

With thousands of different types of beer being sold through beer distributors, getting your data into new software can be a daunting task.

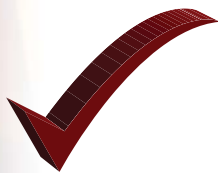

We get you started with a database to minimize the products you have to build from scratch.

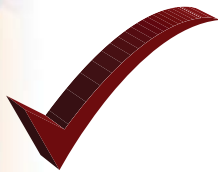

Over 4,000 items and growing!

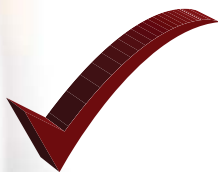

Over 1,000 SKUs already assigned to items!

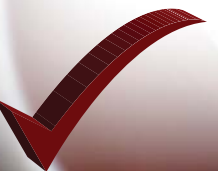

290+ Brands

21 Different Package Types

32 Each Container sizes for State Reporting

Over 1,000 families
